

# VODNI DNEVI 2021

**Rimske Toplice, 7.–8. oktober**  
Kongresni center Rimske terme

Dear Sir or Madam!

The Slovenian Association for Water Protection is organising the traditional Water Days Symposium entitled **Water as a Value**. The 2021 Water Days Symposium is a great opportunity for connecting various fields and industries involved in water protection. Be part of this network and create sustainable solutions together with us!

We are planning a two-day event at Rimske Toplice, and because the number of participants at the congress centre might be limited (depending on the Covid-19 situation), we are going to arrange for the possibility to participate online as well.

The Symposium will offer plenty of chances for an exchange of ideas, opinions and experience, at the same time, it will be a unique opportunity for companies involved in water industry in one way or another to present themselves. The hybrid form of the Symposium will further expand the possibilities of presentation adding various virtual presentation options and digital networking to the presentation in person at the congress centre.

You are cordially invited to join us. Seize the opportunity to form new business ties and create business opportunities, while making the Symposium and the exchange of knowledge and experience with it possible at the same time.

Programme board  
Water Days 2021
